# Policy of the board

#### 28 October 2020

The new board has selected several points of attention for the coming period.

### Contract negotiation LISA

While the contract negotiations for 2020 have been concluded, the contract negotiations for 2021 and beyond have already started. Our goal is to finalize these negotiations during this board period, so that 2021 will be less uncertain than 2020 was. Our main focus for these negotiations will remain to ensure that students and associations will receive and/or retain access to the services they require.

#### Future of SNT

The contract negotiations for 2021 and beyond are pretty far along already. With the knowledge we have, we want to re-determine the course, goal and definition of SNT as an association. As both the amount of services we can provide, and the amount of members with the know-how to maintain these services are decreasing, we want to involve our current active members on what they want and what they think is possible. We want to come up with a plan that describes fundamental changes that might need to be made, as well as how these changes can be achieved and in which period of time.

## Prospect for new members

Tying closely the previous point of the future of SNT, we want to organise (corona-proof) activities and promote the association to attract new members. We think it's important to first know where the association is headed, so we can target prospective members more directly and in that way hopefully create more traction.

#### **Documentation**

While we have already updated some of the internal documentation, such as the board roles and the transfer of these tasks, not everything is updated yet. We plan to expand on the internal documentation and remove unnecessary information. Furthermore, there will be more documentation necessary to describe the future of SNT. The services which SNT will no longer provide, will need to be removed from the documentation and the new agreements between LISA and SNT should be described as well.
